Weibo Series Google Pixel 4 apps are expected to debut on new phones now available for download. If you've been following the Pixel 4 leak frenzy, you may have seen a bunch of new developments after a website called Nexttrifit gained access to the pre-release Pixel 4 XL unit. The website (via 9to5Google) shared a number of Pixel 4 apps - a new Google Recorder app, an updated Pixel Launcher, a new Pixel Themes app and several new Live Pixel 4 wallpapers (via XDA). All of these apps are now available for download. Pixel Themes appGoogle's new Pixel Topics app will allow you to customize fonts, design icons, accent colors, and more on Pixel 4 devices. This is my second favorite holiday just for Christmas, but holds a special place in my heart because I get back-to-back goodness from my birthday and then, 24 hours later, all the goodness Halloween brings. People on DualBoot games (creators of other live wallpapers like Celtic HD) have whipped another for us, it's this everyone is haunted and creepy, just in time for Halloween. It's called Haunted House HD, and as far as live wallpapers go, despite being sensitive, it's probably one of the most detailed I've come across. From the moment you pop open a live wallpaper selector and choose Haunted House HD, the Halloween vibe will wash over you. The camera pans the spooky house, shrouded in mist as the light flickers on and off intermittently. Jack-o-lanterns guard the doorway and frightening messages appear above the door in blood. Everything is pretty smooth, despite the fact that so much is going on. The door opens and closes on its own, while the camera sweeps back, the lights turn on, showing a silhouette in the window, and the flag on the mailbox moving up and down on its own will. If you want to go inside the house, you'll have to go to a fully loaded menu setting and change the look of the camera. Inside the house is just as (if not more) busy than the former. The light continues to flicker, the fire is pale, ghostly blue, and pictures of the skull are superimposed on the subject's face. The ethereal steps pulse and disappear on the floor, and strange breezes sucks the chandelier around. It's a lot to take, but it's still great fun. Back to the settings menu when I said loaded, I meant it. You can choose the kind of camera, set the name for the mailbox and doorway, choose the kind of person you want for the pumpkin, and individually turn on or off every variable wallpaper has to offer. If you feel like getting into the festive spirit, Haunted House HD is \$1.99 in the Android Market. We have more photos and download links after the break. The Google Pixel 2 is shaping up to be one of the best phones of the year, and while the non-XL model may not have the most eye-catching hardware, both options will come with some of the best Android software around. One of the many features shown at the October 4th ad event was the Pixel 2 updated live wallpaper, and thanks to a developer named Pranav Pandey, you can now download them to any Android phone running 6.0 Marshmallow or above. Last year Pixel introduced live earth wallpapers that have moved from your home screen to create for some added depth, and Pixel 2's live wallpapers take things a step further by introducing even more moving and interactive parts. One wallpaper shows Lagos, Portugal with crashing waves on a rocky shore, while another showcases balloons flying over Monument Valley, California. There are also Glimmer wallpapers that brighten up when you touch your home screen, goeoy ones with a virtual soup that reacts and changes itself based on your taps and napkins, and even real-time views of Mars and the moon. If it seems that many Pixel 2 features have been ported to other phones recently, it's because they were. Static Pixel 2 wallpapers were available for download before these live, with it, the Pixel 2 2 launcher The camera app has been released as well. The Pixel 2 is an expensive phone, and while these apps and wallpapers won't give you exactly the same experience found on Google's latest and greatest, they sure can get you close. You can download Pixel 2 live wallpaper here. The LG G5 is one of the hottest upcoming phones this year with a quirky battery replacement system and a sleek new metal body.
